

To Whom it May ConcernThe NAB should be ashamed of themselves for lobbying to block traffic and weather broadcasts from XM and Sirius Radio. Public radio stations provide a public service for the general public by broadcasting free radio to everyone. It should be my right as an American if I want to purchase a service to get similar service. Dont stifle the entrepenurial spirit that has made this country great.

I will be sending my confgressman Chris Shays a letter asking him to look ionto this issue. Lobbyist should not be dictating policy at the expense of the American consumer.

Please, do the right thing and allow XM to continue to proviude this excellent and valuable service.

Thank You,  
Jeffrey Colasante
